

## About CERTUM

**CERTUM – General Certification Authority was established in 1998 by IT company present on the market since 1965 and specialized in PKI solutions, information technology, systems integration and IT outsourcing.**

---

CERTUM specializes in certification services to confirm the e-identity, guarantee non-repudiation and provide reliability and security of e-documents and data protection based on digital certificates.

In 2002 CERTUM underwent a number of audits and was approved to have complied with certain [Web Trust<sup>SM/TM</sup>](#) standards for certification authorities (thus being recognized as a trusted certification authority for Microsoft-MSIE products and since January 2010 also the WebTrust Extended Validation) and granted the [ISO 9001:2008](#) certificate.

CERTUM technology and solutions are based newest and secure PKI and is compliant with international standards. CERTUM provides wide range of PKI services:

- [SSL certificates](#)
- [Qualified certificates](#)
- [Time Stamping services](#)
- [DVCS services \(Data Validation and Certification Server\)](#)
- [e-Invoicing](#)

CERTUM puts emphasis not only on obvious aspects of technological security but on compliance of the provided services with legal and standard requirements. In this connection it actively organizes annual international PKI Conference [European Forum on Electronic Signature](#). The Conference is aimed at theory and practical applications of e-signature in business and administration. The Conference offers opportunities for representatives of numerous organizations and businesses from all-over the world to meet and exchange ideas connected with the development of e-signature market.
