

Certificate Revocation Lists (CRL)

Certificate Revocation Lists (CRL) are electronically prepared and certified by CERTUM.

Certificate Revocation Lists can be divided into following certification services groups:

- [certification services](#)
- [qualified certification services](#)

These lists contain the name of a certification authority that issued them and the date of the present and next publication as well as certificates serial numbers, dates and revocation (or suspension) reasons. These lists are published at specified intervals or anytime one of the issued certificates is suspended or revoked.

Certification services

CRL Certum CA
